

### REMARKS

In response to the restriction requirement of April 19, 2006, Applicant hereby elects Invention I, corresponding to Claims 1-34. Applicant wishes to note that Claims 1-34 are drawn to a semiconductor device, rather than to a semiconductor fabrication process, as indicated on Page 2 of the Official Action. Claims 35-46, drawn to a semiconductor fabrication process, have been canceled without prejudice to the filing of a divisional application. The restriction requirement is not being traversed because Applicant agrees that unpatentability of Invention I does not imply unpatentability of Invention II.

Moreover, in response to the election of species requirement, Applicant hereby elects the species of Figure 11 wherein multiple light emitting elements, such as light emitting elements **140**, **140'** and **140''** are contained in a single cavity, such as a cavity **1100**, and a flexible film, such as flexible film **120**, spans the cavity **1100**. New dependent Claim 47 and existing dependent Claims 19-21 are readable on the elected species. Claims 1, 2, 15 and 23-25 also are readable on the elected species. Moreover, the Official Action has agreed that Claim 1 is generic. Applicant also respectfully submits that Claims 2, 15 and 23-25 are also generic to embodiments of Figures 10 and 11.

In view of the above, Applicant respectfully requests examination of Claims 1, 2, 15 19-21, 23-25 and 47, and requests examination and allowance of all of the pending claims if a generic claim is deemed to be allowable.

Respectfully submitted,

Mitchell S. Bigel
